

Environmental Sustainability Statement

Our Sustainability Commitment

At Holy Trinity CofE Primary School, we are committed to reducing our environmental impact, responding to climate change and creating a healthier, more sustainable future for our pupils, our community and the planet.

We believe that by working together and by making responsible choices, we can protect and enhance our environment, both now and for future generations.

What We Commit To

To achieve this, we will:

- **Reduce** our carbon emissions and use energy and water responsibly across our school
- **Minimise** waste, increase recycling and make efficient use of resources.
- **Consider** environmental sustainability in our purchasing and procurement decisions.
- **Encourage** sustainable and active travel for pupils, staff and visitors.
- **Protect** and enhance our school grounds for nature and biodiversity.
- **Prepare** for a changing climate, ensuring our school is resilient now and in the future.
- **Engage** pupils and staff in practical sustainability actions and encourage positive behaviours.
- **Embed** sustainability and climate awareness within our curriculum and school life.
- **Work** in partnership with our families, communities and stakeholders to achieve these aims.

Supporting Our Commitment

Our Environmental Sustainability Statement is supported by our Carbon Footprint Report, Sustainability Audit, Climate Action Plan 2026-2030, Sustainable Travel Plan and our Sustainable Procurement Policy, which set out the actions, measures and targets that will guide our progress.
